

# What's Your Energy Management Legacy Score?

- \_\_\_\_\_ I have proven the value of energy management and efficiency to senior management. They get it.
- \_\_\_\_\_ I have implemented an energy information system that, at a minimum, tracks and reports on utility bills and interfaces with Accounts Payable. It is now an important business system that many departments rely upon.
- \_\_\_\_\_ I am accountable for periodic progress reports that continually demonstrate the value derived by my organization and keep me striving for deeper and deeper savings.
- \_\_\_\_\_ I have gotten my organization to formalize and announce its nearer term goals of superior ENERGY STAR ratings for all buildings and longer term goals of being a net zero building leader and innovator.
- \_\_\_\_\_ Using the priority pyramid of turn off, turn back, tune up, we have recognized the importance of engaging everyone in our energy management efforts via behavior and operational-based programs including training, publicity, etc. as we have secured funding and approval for hardware-based retrofits and facility upgrades.
